REPORT TO THE GOVERNOR, THE LEGISLATURE, AND THE STATE BOARD OF EDUCATION

Baton Rouge, Louisiana
December 1, 1963

Governor Jimmie H. Davis, Members of the State Legislature, and Members of the State Board of Education

Gentlemen:

The 1962-63 annual report of the condition and progress made and of possible improvements to be made in the public schools is submitted according to Section 16 of Title 17 of the *Louisiana Revised Statutes of 1950.*

The financial reports of the Department of Education, the State colleges and universities, the special schools, and the trade schools are contained in the tables of the report. In addition, data on receipts, expenditures, bonds, and financial condition are reflected in the report. Statistics on enrollments, graduates, teachers, transportation, and other items of interest are included.

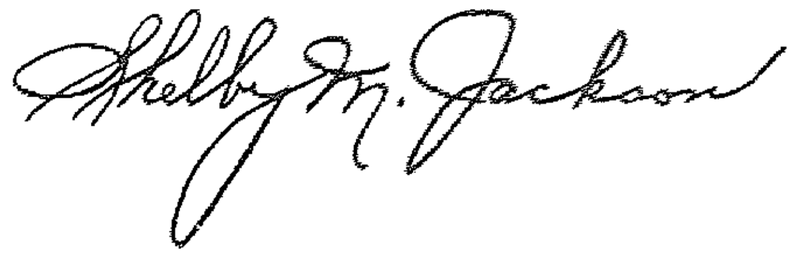
Educational achievements have been attained in all fields and at all levels from the kindergarten through the highest institutions of learning. Many schools are approved as kindergarten, elementary, junior, and senior high schools. The Southern Association of Colleges and Secondary Schools is accrediting an increasing number of elementary and secondary schools. Evaluation and approval is being sought by additional schools. Quality education is an objective of all areas of instruction.

The number of classroom teachers holding a baccalaureate, masters, or higher degree exceeds 93 percent. Pre-service and in-service programs upgrade teachers, principals, visiting teachers, supervisors, and superintendents.

The educable count has passed the million mark in Louisiana and more pupils are registered in public schools. Shifts in rural and urban population necessitate more school facilities. The holding power of schools is increasing as reflected by more graduates. Graduation requirements rank as high as the requirements of other states.

Louisiana is committed to the philosophy of State responsibility for educating every child. All levels of education from kindergarten through college must be adequatdy supported by increased funds. Leadership is devoted to the achievement of a total program of education. The cooperation of responsible leaders and the lay public is solicitd.

Respectfully submitted,



SHELBY M. JACKSON
State Superintendent of Public Education

LETTER OF TRANSMITTAL

Baton Rouge, Louisiana

December 1, 1963

Honorable Shelby M. Jackson
State Superintendent of Public Education
State Capitol Building
Baton Rouge, Louisiana

Dear Mr. Jackson:

Section 16 of Title 17 of the *Louisiana Revised Statutes of 1950* requires the State Superintendent of Public Education to make an annual report to the Governor, the Legislature, and the State Board of Education. The *One Hundred Fourteenth Annual Report for the Session 1962-63* has been prepared for your approval and transmittal in accordance with this requirement.

This report contains financial and statistical data on the operation of the schools for 1962-63. The trends from 1945-46 through 1962-63 are also reported.

The Research and Statistics Section has received the cooperation of parish and city school superintendents and the staffs of the local school board offices. The Divisions of School Administration, Higher Education, Elementary and Secondary Education, Vocational Education, Special Services, and Vocational Rehabilitation and Veterans' Training have assisted in the compilation of the report.

We appreciate the opportunity to be of service.

Respectfully submitted,

JACK R. GAMBLE
Executive Assistant to the Superintendent

J. BERTON GREMILLION
Director Research and Statistics

NORMAND H. EDWARDS
Consultant in Research

THE STATE SUPERINTENDENT DISCUSSES EDUCATION IN LOUISIANA

Louisiana has an outstanding school system. Public education in this State is built on a firm foundation. A total program of education is one designed to give children, youth, and adults the kind of learning experiences which will prepare them to be worthy members of society.

Too little tribute is paid to the magnificent contribution which public education has made in the development of our way of life and the highest standard of living in history. All citizens can be proud of the program of public education that has been developed in Louisiana. We have to work continually to improve our schools each year because society has a great need for broadly educated citizens at all times who have the intellectual ability and moral convictions to make decisions that determine the course of mankind's advance. Therefore, we must never lose sight of the fact that the provisions of a sound program of public education for all people is the number one responsibility of the State.

Public education has played an important role in the economic and social development of Louisiana. These achievements have helped to bring about more benefits for the people, better living conditions, and billions of dollars in economic value and business. As a result, greater bank deposits, a higher standard of living, development and conservation of resources, and more economic and social improvements for the entire State have been realized. There are better homes, communities, businesses, agriculture, industry, cultural growth, and improvement in all phases of life's activities. There has been continuous development of programs of education in improving the quality of schools each year. All phases of the instructional program have been rapidly advanced and tremendously improved in recent years, and many programs have received national recognition on numerous occasions. Public schools afford people opportunities to develop skills, abilities, and capacities in order that contributions may be made toward improving living conditions in the State. Yes, public education in Louisiana has been a story of

progress and has led the way for the unparalleled economic and cultural advances which this State has made. Funds used for public education are wise investments in the present and future development of Louisiana. Returns on funds expended for public education far exceed the value of the original investment.

A State which advances the mental ability of its people will become stronger and will have a greater potential for survival. The direction this State takes in the next few years will depend in great measure on how well the talents and skills of our people are developed and utilized. This will require continued improvement in all phases of education. We cannot afford to stunt economic growth, neglect the domestic needs, or shortchange our future security. It must be remembered that the educational system of any State is the symbol of its way of life and the foundation on which its future will be erected. The best plan that any State can have is one that provides opportunities for people to become better producers.

The increasing complexity of modern industrial society carries with it a proportionate increase in the demand for a broad educational system. Human beings differ widely in intellectual capacity, talents, skills, abilities, tastes and aspirations, and vocational interests. As a result, there are people who follow the professions, while others are merchants, farmers, politicians, government workers, bankers, engineers, mechanics, doctors, lawyers, laborers, diplomats, poets, artists, musicians, teachers, business executives, and many other occupations. This variety is good for it provides a society capable of performing the diversified tasks of the community. The school program must continue to be arranged so that each child will have an opportunity to develop to the extent of his own capacity. We believe in high standards of performance and achievement. Complete cooperation and support in accomplishing this task are needed constantly. Therefore, a total program of education for public investment embracing an expanding school system capable of playing its role in supporting our way of life is strongly advocated.

Efforts to provide good education to meet the needs

of all students must be directed toward the fundamental responsibility of making sure that we do not educate for material ends alone. The education program provides for competence, knowledge, wisdom, and understanding which are essential for a full, creative, and productive life. Moral and spiritual values must be emphasized and students must be taught to live as good citizens. Selfish ends and objectives should be overlooked and constructive thought should be channeled towards the individual's responsibilities for the common good and growth of the community and State. There must be an appreciation on the part of the students.

There must be constant evaluation and re-evaluation of the schools. There must be an abundance of good teachers selected on the basis of ability, personality, and high ideals. Public support is essential to a good school program. The people must have a thorough understanding of the operation of the school program. They must be reminded that good schools are the result of quality teaching. The demand for better schools calls for the continuation of an in-service training program which is necessary for the improvement and enrichment of the educational program.

Many of the problems in school administration which have plagued neighboring states for many years have long been solved in Louisiana. Education personnel in the State are continuing to take a leading part in improving educational administration, instruction, and supervision in the South and in the Nation. For example, Louisiana has only 64 parish and 3 city school systems as compared to hundreds and even thousands in other states. This unique organizational structure has made it possible for all children and youth to have educational opportunities in addition to providing for more efficiency in the operation of the schools. The goal of having efficient administrative school units at the local level has been achieved in Louisiana.

Another interesting fact with reference to the school administrative units concerns the number of school board members serving in the various states. Many states have

more school board members than does Louisiana. Good school boards develop sound policies for public education. The 67 school boards make educational policy for the school administrative units and are duly elected representatives of the people. The administrative school boards in Louisiana are composed of laymen and are large enough to be representative yet small enough to work effectively.

With the continued development of the teacher education program, a fine staff of competent and professionally trained school personnel to carry on the affairs of our great enterprise in public education has been provided. Studies have continually been made over the years with reference to teacher education and certification in order to assure the best trained teachers. Studies and evaluations are made continuously. Teacher education and certification have been studied carefully on a State-wide basis. As a result of continuous evaluations, an outstanding teacher education and certification program has been developed to improve the educational system during the past fifteen years.

It is interesting to note that in 1929-1930 only 26 percent of the public school teachers in Louisiana had four or more years of college training. In 1939-1940, approximately 50 percent of the staff had earned a Bachelor's Degree. In 1947-1948 there were approximately 62 percent, and in 1962-1963 more than 93 percent of the public school teachers had four or more years of college training with corresponding degrees. This reflects great progress in the professional improvement of Louisiana's school personnel; and continued progress is being made. Louisiana has far exceeded the average for the United States in this development.

School personnel participate in in-service training programs each year through conferences, seminars, faculty study groups, evaluative programs, individual professional studies, workshops, and other phases. This is positive proof that the school personnel of Louisiana are making every effort to do the finest job possible for the boys and girls of this State.

In 1948 your State Department of Education was re-

organized for leadership, efficiency, and service with a competent and efficient staff rated among the best in the Nation. Each year this staff has been improved. The members of your State Department of Education have continued to provide parish and city school boards and all educational agencies with the greatest service possible during the past fifteen-year period.

The field of primary and elementary education has been greatly stimulated and improved. The schools are doing an excellent job of teaching the three R's as well as emphasizing important objectives of better health, social attitudes, and understanding. Emphasis is placed on character, conservation education, and citizenship in order that boys and girls may grow and develop with the right foundation in being good useful citizens. Improvements have been made in secondary education. The program of instruction has been greatly enriched, and the needs of all students are being served. Today, boys and girls read better, write more legibly, have greater competency in the mathematical processes, receive training in human relationship, meet vocational responsibilities, satisfy spiritual and aesthetic needs, and learn to live as members of a family and as good citizens.

Louisiana has led the South for several years in the number of new member schools admitted to the Southern Association of Colleges and Schools. Self-evaluations by committees are conducted each year by an ever increasing number of schools for the purpose of membership in the regionally accrediting agency. This program is of major significance in improving administration and instruction.

School transportation has been improved, and school bus operators have received instruction in safety and maintenance. Today, more transportation is provided in order that all children may have educational opportunities. There have been numerous workshops and meetings to improve the school transportation program. Adequate transportation promotes better school attendance, increased holding power of the schools, health, and safety of the school children, and better educational opportunities for all children.

Parish and city school boards have developed construction programs at a more accelerated rate than ever. All building plans for new construction are submitted to the State Department of Education, and the plans are carefully examined to assure maximum usage. The cooperation of the State Fire Marshal and the State Board of Health is secured in a review of these plans in order to achieve every safeguard for the protection of children's lives. The buildings and facilities constructed by parish and city school boards represent excellent construction and are comparable to the finest buildings found in this Nation.

During the past fifteen years there has been marked improvement in vocational education. More people are receiving training in all fields of vocational education in Louisiana than ever before. It must be remembered that a man's occupation plays a vital role in his life. From his work he must derive not only a living but also many of his life's satisfactions as well. If he is vocationally well trained and adjusted, he will be a more efficient worker, a happier individual, and a better citizen.

A good school program will serve to combat and eliminate such conditions as adult illiteracy, school absenteeism, juvenile delinquency, and health and educational deficiencies which weaken State and national life.

In addition, certain subjects have received added emphasis in the program of studies offered by a school. A six week unit in Americanism vs. Communism is included as part of the course in American History. This requirement must be met for high school graduation. Instruction on the Federalist Papers, Constitution of the United States, and Declaration of Independence are required.

The manpower of a State includes skilled men and women at every station in the process of production, skilled management, and capable administration. It includes well-prepared, oncoming groups of loyal, intelligent, and healthy youth to replace and augment the efforts of the present adult generation. Overcrowding or lack of equipment must not impair the basic education of our young people. High priority must be given the educational system at all times. There is no material investment that nets so great a profit as the support of a well-planned school program.

The rising number of school-age children and the larger percentages of children remaining in school have heavily increased enrollments, and these increases are expected to continue in the future. Citizens have become increasingly aware of the importance of education. The security of this State and Nation and the hope of the free world depend in great measure upon the character, ideas, ingenuity, and competence of each successive generation of young people. The complexities of present-day living require broader knowledge, greater skill, and deeper understanding. Therefore, education is more important than ever. Our youth constitute an individual and collective challenge. Even though vigorous efforts have been made and are still being made to provide better educational opportunities, it is important that prompt and constructive action be provided in order to achieve the present-day and future needs.

The public schools exist to serve the children, youth, and adults. They are supported by public investments in amounts that are ultimately determined in accordance with the wishes of the electorate. Public school officials are grateful for the splendid cooperation and support given to the cause of public education in the past, and the wholehearted cooperation of everyone for the continued support of public education in keeping with the future needs of all the people is solicited. The very survival of our institutions depends upon maintaining and improving the program of public education.

The most serious problem facing education is that of providing adequate financing for public education. In fact, many other problems will be eliminated if this problem can be solved. Unprecedented increases in the number of children attending school will demand more classrooms, teachers, bus transportation, custodial workers, school supplies, textbooks, and everything that is necessary to operate a good school. It is not reasonable to conclude that the additional expenses for the increasing school

population each year can be absorbed by an already exhausted school budget. Funds must be provided to meet these ever-increasing costs or investments in our children. Considerable funds are required to operate good schools, but it is the best investment that can be made in mankind. People are living in the most prosperous times that our State or Nation has ever experienced. The industrial development of our State may be expected to continue to grow at an accelerated rate. All phases of life's activities have been improved. Is there any logical reason preventing a solution to the problem of affording a minimum standard of education for our children? To ignore this responsibility would represent a tremendous injustice to the children of Louisiana. Therefore, it is urgent that through constituted channels of State government more of our substance of economy be allocated for education in order to assure a system adequate to the needs of the times. Naturally, it is necessary to practice all reasonable efficiency and economy in the operation of the public school program. School boards of the State and all other units in our public educational system must be provided with sufficient funds needed to provide the very best school personnel from the primary grades to the highest institutions of learning. Every effort to improve the status and standards of education increases the promise for a more prosperous tomorrow. With adequate support schools can offer a greater challenge for the capable students in a manner which does not deprive a single child, whether superior, normal, retarded, or handicapped, of an essential element of his equal birthright—the right to develop his own potential in a public school.

Louisiana enjoys a most favorable location for trade with other countries. There is no limit to the possibilities for increasing our industrial, agricultural, business, and transportation programs and potential. Our sole limitation may be the degree to which opportunities are provided people through education and training needed to exploit available resources. Every dollar expended to improve educational programs contributes to the prosperity and happiness of Louisiana's people. Education is Louisiana's best investment.

It is a pleasure to report the many outstanding activities in educational development during the year. As a sincere public official, the future of our State and its people has always been uppermost in my thinking. Cooperation and assistance from everyone are needed in order to maintain our sovereignty, freedom, and splendid system of public education for all people—children, youth, and adults. The continued efforts and cooperation for the further development of public education are solicited from all interested citizens.

Respectfully submitted,

Shelby M. Jackson

State Superintendent of Public Education

*Includes 14 deceased beneficiaries and survivors.

TABLE XXIII (Continued)

TEACHERS' RETIREMENT SYSTEM OF LOUISIANA

BENEFITS PAID TO RETIRANTS ON PAYROLL AT END OF 1962-63

From

Act No. 83 of 1936 as Amended
Act No. 228 of 1944 as Amended
Act No. 102 of 1950 as Amended
Act No. 568 of 1952
Act No. 27 of 1957 as Amended
And Act No. 440 of 1960

Classification of Retirants Receiving Allowances at June 30, 1963	Number of Cases	Size of Annual Allowance		
		Smallest Amount	Average Amount	Largest Amount
1. Total on payroll at end of year	3,056	$ 102	$2,365	$6,498
2. Total who retired for superannuation or service	2,618	144	2,483	6,498
3. Total who retired for disability	310	359	1,778	2,863
4. Total beneficiaries of deceased retirants drawing benefits under options (allowances to beneficiaries; not lump sum payments)	77	102	981	2,797
5. Total surviving spouses drawing benefits under Option 2	51	706	1,987	4,424
6. Total who elected straight life annuity rather than a lesser amount with survivor benefits	2,524	144	2,390	5,723
7. Total who elected a lesser allowance for self so that the unused balance of accumulated contributions at retirants' death may be paid to beneficiary or estate in a lump sum (Option 1)	217	491	2,515	5,664
8. Total who elected a lesser allowance for self with same allowance continued after death for beneficiary (Option 2)	40	778	1,880	5 508
9. Total who elected a lesser allowance for self with half the allowance continued after death for beneficiary (Option 3)	81	628	2,320	5,637
10. Total who elected some other option permitted by retirement board (Option 4)	66	1,367	3,182	6,498

TABLE XXIII (Continued)

TEACHERS' RETIREMENT SYSTEM OF LOUISIANA

THE ACTUARY'S VALUATION BALANCE SHEET AS OF JUNE 30, 1962

ASSETS

Present assets of system creditable to:		
Annuity Savings Fund including $2,190 in the Special Account		$ 83,722,573
Annuity Reserve Fund		6,535,050
Pension Reserve Fund		2,184,007
Pension Accumulation Fund		161,398,076
Prospective contributions to the Pension Accumulation Fund:		
Normal contributions	$ 143,869,891	
Accrued Liability contributions	86,907,227	
Contributions necessary to finance the benefits under Act 186 of 1962	20,752,343	251,529,461
TOTAL ASSETS		$ 505,369,177

LIABILITIES

Present value of benefits on account of which contributions have been accumulated to date in the Annuity Savings Fund			$ 83,722,573
Present value of benefits payable on account of beneficiaries or their dependents now drawing retirement allowances from:			
Annuity Reserve Fund		$ 6,591,024	
Pension Reserve Fund		2,211,432	
Pension Accumulation Fund		45,509,052	
Total in Reserve Funds to pay members on retirement, June 30, 1962			$ 54,311,508
Present value of future benefits payable to present active members to be paid into the Pension Accumulation Fund:			
To be met by contributions of employing agencies:			
Service pensions	$318,195,255		
Disability pensions	23,480,113		
Death benefits while eligible for service retirement	4,907,385	346,582,753	
To be met by 1/2% of the collectible taxes of each parish except Orleans as provided under Act 186 of 1962:			
Service pensions	$ 19,169,073		
Disability pensions	663,486		
Death benefits while eligible for service retirement	918,884	20,752,343	
Total prospective benefits on account of members in active service			367,335,096
TOTAL LIABILITIES			$505,369,177

NOTE: At the time of the printing of this report, (Teachers' Retirement System of Louisiana, Twenty-Seventh Annual Report of the Board of Trustees 1936-1963), the actuary's valuation as of June 30, 1963, is not completed. The valuation as of June 30, 1962, hereinafter set out, shows assets in the amount of the liabilities.
