STATE OF LOUISIANA
DEPARTMENT OF EDUCATION
BATON ROUGE

January 3, 1927

*Governor O. H. Simpson,
Members of the Legislature and
Members of the State Board of Education:*

GENTLEMEN:

Complying with Act 100 of 1922, I respectfully submit the important data on the public and private schools in Louisiana for the session of 1925-1926.

The report is divided into two parts. Part One gives State-wide public school facts, and Part Two gives the essential information concerning the public schools by parishes.

Practically all of the information contained in Part One of the annual report has been distributed to school officials and the press in the form of circular letters. The data are collected and published in pamphlet form for the convenience of those who may wish to preserve them for future reference.

Respectfully submitted,
T. H. HARRIS,
State Superintendent of Public Education.

ANNUAL REPORT

PART I

A DIGEST

OF THE

STATISTICAL TABLES

OF

THE SESSION 1925-26

THE SCHOOL SYSTEM

I.

I receive so many requests from out-of-State sources for a statement of the public-school machinery of Louisiana that it seems appropriate to give an outline here of the system under which the public schools of the State are operated.

(a) THE STATE:

We have a State Board of Education of eleven members. Eight are elected for terms of eight years, one from each of the Congressional Districts. The terms are overlapping, two members going out of office every two years. Their successors are elected in the Congressional election. Three members are appointed by the Governor, one from each of the Public Service Commission Districts. The terms are for four years.

The Board elects its own President and Vice-President and fixes their terms. It organizes with such committees as it may think necessary. At present there are committees on education, finance, buildings, law and legislation.

There is a State Superintendent of Public Education elected by popular vote for a term of four years. He is the Secretary of the State Board of Education, but not a member of that body.

The State Board of Education has general control of the elementary schools and high schools and direct control of all State-supported schools, with the exception of the State University, which has a separate board. The Board's control of the public schools proper is of a very general nature, its important duties consisting of:

The certification of all public-school teachers: Certificates are issued on the basis of educational qualifications and teaching experience. No certificates are issued upon examinations.

The fixing of standards to govern high schools: These standards cover such matters as the physical plant, labo-

ratories, libraries, the number of high-school students and the qualifications of high-school teachers. Under present rules, high-school teachers are required to hold at least a baccalaureate degree. Teachers of grades in connection with high schools are required to have completed at least two years in teacher-training institutions.

Fixing standards to govern parish (county) superintendents: The present standards are at least a baccalaureate degree and five years of successful teaching experience.

The examination and approval of plans and specifications for proposed public-school buildings: In order to perform this service efficiently, the Board employs a practical builder who knows a great deal about school architecture. This employee not only examines plans and specifications of buildings and prepares plans for many buildings costing less than \$10,000, but he also visits practically all school buildings while in the course of construction and gives local authorities advice on such subjects as materials and workmanship.

Adopting text-books for both the elementary schools and the high schools: Text-book contracts run for six years, and the elementary books and the high-school books are adopted at periods three years apart.

Keeping a force of supervisors in the field that visits schools and advises with school officials, teachers, and supervisors as to the type of classroom procedure calculated to produce the best results.

In its management of the seven State schools under its control, the State Board appoints an executive committee of three members for each institution, the State Superintendent being chairman of each committee, and it requires that all proposals affecting the different institutions shall first be passed upon by the executive committees concerned before reaching the Board for final action.

The activities of the State Department of Education are of a cooperative nature. The purpose is not to direct the efforts of the parish school forces, but to advise with

them and to suggest procedures that would probably prove wise.

(b) THE PARISH:

The parish school machinery consists of a parish school board of from five to fifteen members, the average membership being from seven to ten. The members are elected by the people of their parishes, and the terms are for six years, one-third of the membership going out of office every two years. They are elected at the Congressional elections when there is in the State a minimum of political excitement.

The parish school board has entire control of all public schools in the parish, including any cities that may be located in the parish. The board elects a parish superintendent for a term of four years and fixes his salary. It selects all public-school teachers upon the recommendation of the superintendent. It determines the number and location of public schools that shall be operated. It has control of all special school tax elections held for the purpose of raising funds for the support of schools or for floating building bond issues. All such elections may be parish-wide or by districts. Usually those intended to raise maintenance funds are on a parish-wide basis, while most bond issues for buildings are floated by districts. The board has entire control of the consolidation of country schools and the providing of transportation for country children. It may eliminate small schools and organize large consolidated schools whenever, in its judgment, such action is wise and necessary. In short, Louisiana has the parish unit plan of school administration in as pure a form as it is perhaps to be found anywhere in America.

The public-school funds consist of:

State: A two and one-half mill tax on the State assessment, which yields about three and three-quarter million dollars a year.

A tobacco tax of one cent on each retail sale of ten cents or fractional part of ten cents of all tobacco products. The yield from this source is from one and one-half millions to two million dollars a year.

The State school funds are distributed to the parishes on the basis of the school population, that is, children between the ages of six and eighteen.

Parish: Each parish is required to set aside for public-school purposes three mills on the parish assessment.

All poll taxes and certain fines and forfeitures are devoted to public education.

The people may authorize by vote any additional school funds required for maintenance or buildings.

The school funds from all sources last session amounted to approximately \$22,000,000, of which the State contributed a little less than 20%, and the parishes a little more than 80%. The Tobacco tax recently provided by the State will probably increase the State's contribution to public education to something like 25% of the total school funds.

It would, I think, be difficult to improve upon our public-school machinery. The most logical criticism would be perhaps directed at our method of distributing the State school funds, which is unquestionably obsolete. A much wiser system of distribution would be to use as bases the number of teachers employed, taking into account the qualifications and experience of teachers and the average attendance of children, taking account of the length of the school term, reserving a reasonable minimum to be used for the special benefit of several extremely poor parishes. While the plan briefly outlined would represent an improvement, I am of the opinion that this would be an inopportune time to attempt to incorporate the plan into law.

II. THE STATE INSTITUTIONS UNDER THE CONTROL OF THE STATE BOARD OF EDUCATION:

The law charges the State Board of Education with the duty of administering the affairs of all of the State institutions, with the exception of the University. These institutions are: The Louisiana State Normal College, with an average enrollment of 1,000 students; the Louisiana Polytechnic Institute, with an enrollment of about

800 students; the Southwestern Louisiana Institute, with an enrollment of about 800 students; Southern University (negro), with an enrollment of about 600 students; the State School for the Deaf, with an enrollment of approximately 175 students; the State School for the Blind, with an enrollment of about 75 students, and the State School for Blind Negro Children, with an enrollment of about 30 students.

The curricula of the three institutions first named above have recently been thoroughly revised, after numerous conferences with the presidents and faculties of the schools in question in order to have them conform to the best practices to be found in the country.

The Legislature of 1926 appropriated a little more than \$1,000,000 for buildings and equipment at the seven institutions mentioned. The building program is now well under way, and by the end of the two-year period covered by the appropriations, all of the State institutions will be in much better condition from a physical standpoint than ever before. The building appropriations mentioned were made out of what is known as the severance tax, and if the Legislature should continue the practice for a few years of devoting the severance tax collections to improvements at the State schools, all of those institutions will be splendidly equipped from the standpoint of physical plant to respond to the demands that will be made upon them.

III. HIGH SCHOOLS:

The people of the State have, for a number of years, manifested a deep interest in high-school education. They have built high-school plants costing from \$50,000 to \$1,000,000 each and they have enrolled their children in unusually large numbers in high-school classes. The high-school attendance last session was approximately 40,000, and the number of high-school graduates, between 6,000 and 7,000. There are at present in the State 332 State-approved four-year high schools, 89 of which are members of the Southern Association of Colleges and Secondary Schools.

The high schools are operating courses of study requiring sixteen units for graduation, and they require the employment of teachers who have earned at least the Bachelor's degree.

The feeling is practically universal among the people of the State that an elementary education is not sufficient to meet the demands of modern life, and they are therefore, requiring their children in large numbers to pursue high-school courses. There is every reason to be proud of our system of high schools in such respects as the numbers of high schools that are supported, the numbers of children that attend them, the character of high-school work required and the high qualifications of teachers employed to give the high-school instruction.

IV. COUNTRY SCHOOLS:

Our system of the parish unit of school administration has made it possible for the people of the State to organize their country schools on a highly satisfactory basis. There are probably fewer than 10,000 children in the entire State who are taught in one-teacher schools. The great majority of the country children are in consolidated schools, where they are taught under the same conditions and usually by teachers of the same training as children in the city schools. It is not unusual to find the best school plants, costing from \$50,000 to \$150,000, in villages and strictly country communities, and to find in these country schools many of them organized as senior high schools, with college and normal school graduates, giving the instruction.

To make possible the success of the country schools, school boards are furnishing transportation for more than 50,000 country children. Many other thousands provide for their own transportation. As the good roads system is extended throughout the State, school boards will be able to do more in the way of consolidation, especially by eliminating the high-school departments in small high schools, and transporting the high-school students of such small schools to nearby high schools and by transporting the pupils of the upper grades of country schools

below high-school rank to conveniently located high schools.

Our country school conditions are such as to justify the statement that little or no distinction is made between country schools and city schools, that one is as good as the other and that our country children enjoy the same educational opportunities as our city children. This condition is due primarily to our school system, which designates the parishes as the unit of school administration, with the result that generally funds are raised on a parish-wide basis and that the school board is charged with the duty of providing, as nearly as possible, for equal educational opportunities throughout the Parish.

V. CLASSROOM INSTRUCTION:

It is the opinion of those in position to judge that classroom results today are superior to those of past years, and this condition is due to the fact that the educational forces of the State have been, for a number of years, concentrating their efforts on the proposition to improve classroom instruction. Employees of the State Department of Education, the parish superintendents, special classroom supervisors, principals and teachers have been co-operating to determine the methods of procedure in the various school subjects that promise the best results. They have attempted to show pupils how to attack their problems with the promise of mastering them, and then they are constantly checking the results of instruction to determine their effectiveness, applying remedial measures in the case of individual pupils to remove disclosed difficulties and deficiencies. The result of all of this intelligent effort is, I feel perfectly safe in asserting, more satisfactory progress on the part of pupils than pupils have heretofore made. There is a profound consciousness on the part of schools officials and teachers that all public school effort heads up in the classroom, and that nothing should be left undone to enable every child attending school to make such progress in his studies as his mental capacity will permit.

It has been our experience that the employment of

special classroom supervisors in the larger parishes is an excellent investment, and I have no hesitation in saying that this question of special supervision should receive careful consideration by several large parishes which have not yet entered that field.

VI. ADULT ILLITERACY:

According to the returns of the Federal census of 1920, 11.5% of our white population over ten years of age is illiterate, that is, unable to read and to write, and 38.9% of the negro population is illiterate. These figures place Louisiana at the top of the list of illiterate states, and while the facts are discouraging and, to some extent, humiliating, they are easily accounted for, and they do not reflect upon the public-school efforts of our people at the present time. Our illiteracy is due to the attitude of the people of our State toward the subject of public education until about a quarter of a century ago. Until that time the feeling was rather general throughout the State, even among educated men and women, that education was a parental and not a governmental duty, that if parents desired educational facilities for their children, they should provide them and pay for them. The result was that schooling was available to the minority of the population, while the majority enjoyed little or no chance to attend school. Under these conditions, tens of thousands of the white children and practically all of the negroes grew up illiterate. Since our people accepted the principle some twenty-five or thirty years ago that children should be educated at public expense, they have made highly satisfactory progress in the development of their schools. At the present time practically all white children are attending either public or private schools, and the same statement can be made of a majority of the negro children.

Our illiteracy is chargeable to conditions that prevailed several years ago and over which we, of this age, have no control. There is some comfort in the fact that the returns of the Census Bureau show that Louisiana is one of the two states that is leading all of the states in

the Nation in wiping out illiteracy. While the above facts account for our unenviable status in the matter of adult illiteracy, it is true that entirely too many of our people are in the illiterate class and that every possible effort should be made to improve our unfortunate condition in this respect. Efforts are being put forth in a number of parishes at the present time to reach adult illiterates with instruction with the hope that the results of the 1930 census will prove less damaging to us.

VII. THREE STATE-WIDE CONFERENCES:

We have just held three conferences of a State-wide nature which will result, I think, in advancing the interests of public education.

A conference in the interest of classroom supervision was held on January 20th and 28th, 1927, in the City of Opelousas, which was attended by the twenty or more special classroom supervisors in the State, and by a number of parish superintendents and supervising principals. The members of this conference observed superior teaching in certain subjects in several of the St. Landry Parish public schools, after which there were highly instructive discussions which had for their purpose the emphasizing of the fundamental principles that enter into the teaching and learning processes. One result of the conference was an organization to capitalize the most successful teaching talent of the State in constructing a course of study in detail for the teaching of English in the elementary grades. Should this effort succeed, as it no doubt will, the same plan will probably be followed in reaching an agreement as to the materials and the procedures that should be used in teaching other elementary and high-school subjects.

On January 27th and 28th, 1927, a conference composed of parish superintendents, parish school board members, and a few principals, was held in Webster Parish. The main purpose of this conference was to emphasize the importance of the principle that a system of parish schools should, as far as possible, provide for uniform school taxation in the parish, and especially

for equal educational opportunities for all children in a parish. It is safe to say, I think, that all left the conference with the very definite feeling that it is wise and proper to raise maintenance school funds on a parish-wide basis, and that a parish school board should endeavor, to the extent of its ability, to operate equally efficient schools in all parts of the parish, irrespective of the wealth or poverty of different communities.

A high-school conference was held in the City of Lake Charles on February 10th and 11th, 1927. A day was spent observing superior classroom effort in the Lake Charles and the Sulphur high schools; then an evening and a day were devoted to discussions of high-school problems, the purpose of the discussions being to reach an agreement upon the fundamentals that must operate in successful high-school effort, and the results were, I think, highly satisfactory.

VIII. THE TOBACCO TAX:

The Legislature of 1926 made provision for a tax on tobacco products of one cent for each retail sale of ten cents or fractional part of ten cents. The tax is evidenced by stamps, which the retail dealers are required to purchase and to affix to the tobacco products which they offer for sale. The proceeds of the tax are deposited in the State Current School Fund and are distributed to the parishes on the basis of the school population. The law became operative October 1st, 1926, and the returns so far indicate that the annual yield will be from \$1,500,000 to \$2,000,000.

The tobacco tax was enacted in response to the demand for additional school funds in numerous parishes and to the belief that the State Government should bear a larger proportion of the burden of public-school support. At the time of the enactment of the tobacco tax law, the State Government's contribution to public-school support was a little less than 20% of the total school funds, and the parishes' contribution, a little more than 80%. Since practically all school funds, both State and local, were raised on the ad valorem basis, the communities with low assess-

ments were feeling very keenly the pinch of high taxation. The tobacco tax will increase the State's support of the public schools to probably 25% of the total of school expenditures, and the placing of the additional \$1,500,000 or \$2,000,000 on a luxury like tobacco will lighten the general property tax to that extent.

All indications are to the effect that the purchasing public is favorably inclined towards the tobacco tax, and it is hoped and believed that time and experience will convert the dealers to the same view. I wish to say, by way of commendation, that the dealers so far have generally co-operated, have accepted the law in good spirit, and they are being governed by its provisions with only isolated instances of violation.

A FEW ESSENTIAL FACTS OF THE SESSION 1925-26

The statements which follow give the essential State-wide school statistics, but a few of the most important facts are summarized below:

1. FINANCES:

The public-school receipts from all sources last session were.....	\$22,579,415.00
Of the sum mentioned, the current school fund amounted to.....	\$ 3,834,234.00
The parish three-mill Constitutional tax.....	6,614,771.00
Parish-wide maintenance taxes.....	5,924,145.00
Taxes from other local sources.....	1,391,738.00
Sale of building bonds yielded.....	4,185,482.00

2. EXPENDITURES:

The public-school expenditures last session amounted to	\$20,672,063.00
This amount included:	
For operating the schools.....	\$14,310,284.00
Sites, buildings, and equipment.....	4,192,256.00
To retire building bonds and pay interest on same	2,169,222.00
In other words, the school receipts for the session amounted to approximately	\$22,000,000.00
The expenditures amounted to approximately	20,000,000.00

3. TEACHING FORCE:

- (a) The public schools employed last session:
- | | |
|----------------------|-------|
| White teachers | 8,576 |
| Negro teachers | 2,379 |

Of the white teachers, 1,877 were college graduates; 4,294 were credited with as much as two years of college work, but less than four years. Seventy-two out of every 100 of the white teachers were credited with two or more years of college work. These figures speak eloquently of the efforts of school officials to place the instruction of children in the hands of well educated, competent teachers.

(b) Salaries:

- The parish superintendents were paid an average salary of\$3,298.00
- | | |
|-----------------------|----------|
| Male teachers | 1,334.00 |
| Female teachers | 1,004.00 |

The salaries of superintendents are reasonable, though not high, but the salaries of teachers, both men and women, are low when viewed in the light of the high qualifications of our public-school teachers.

4. SCHOOL ATTENDANCE:

- (a) White public schools registered..263,359 children
 White private schools registered..... 38,000 children
 There were approximately in the high-school departments (white) 40,000 children
 Number of graduates..... 6,379 children
- (b) The negro public schools registered 130,878 children
 Negro private schools, approximately.. 12,000 children

5. EDUCATIONAL COSTS:

- (a) The per capita cost of instruction in the elementary grades, based upon registration, was\$39.99

- (b) The per capita cost of high-school instruction, based upon registration, was\$93.86

- (c) The per capita cost of both elementary pupils and high-school pupils, based upon registration, was.....\$45.98

High-school costs are probably above the average for the Southern States, but they are considerably below the average for the entire country.

- (d) The per capita cost of negro instruction, based upon registration, was\$11.40

6. STATE COLLEGES:

- (a) Number of pupils registered.....8,306
 (b) Number of graduates.....1,499

Of this number, 758 finished two-year teacher-training courses.

- (c) Private colleges registered.....1,831
 (d) Number of graduates.... 372

One hundred sixty-five of the graduates are from the two-year teacher-training courses.

The registration has reference to the average number of students pursuing college courses for the session, and not to the separate number of young men and women enrolled.

SESSION—1925-1926

FINANCES:

The public school receipts from the various sources were as follows:

1. The State Current School Fund, distributed to the parishes on the basis of the school population amounted to.....\$ 3,834,234.33
2. The parish three-mill Constitutional tax amounted to 6,614,771.79
3. Special school taxes yielded..... 5,924,145.79
4. The receipts from other local sources for maintenance purposes amounted to... 1,391,738.72

5. The total revenue receipts, or funds for operating purposes, amounted to.....\$17,764,880.63

The non-revenue receipts were:

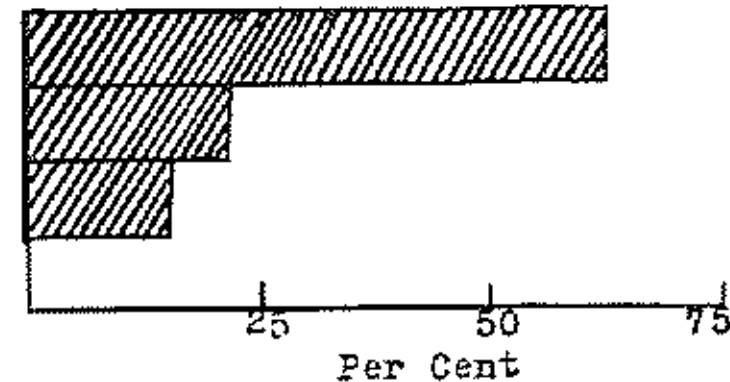

1. Proceeds from the sale of building bonds amounted to\$4,185,482.00
2. Other non-revenue receipts amounted to about 629,053.35

The total of the school funds for all purposes which came into the school treasuries during the session of 1925-1926 was..\$22,579,415.98

The receipts for the session just closed were approximately \$3,000,000 in excess of those of the previous session, the increase coming mainly from parish sources.

Revenue Receipts:

	Amount	Per Cent of Total
Parish - - - - -	\$11,057,611	62.2
State, Federal, and Special - -	4,147,186	23.4
District and Ward - - - - -	2,560,083	14.4
Total Revenue Receipts - - -	\$17,764,880	100.0

Non-Revenue Receipts - - \$13,310,104

DIAGRAM 1. THE AMOUNT AND PER CENT OF REVENUE RECEIPTS FOR PUBLIC EDUCATION FROM STATE, PARISH, AND LOCAL SOURCES

DISBURSEMENTS:

1. The operating expenses, such as salaries of superintendents, mileage and per diem, office expenses, salaries of teachers, transportation costs, janitor service, repairs and upkeep of buildings, etc., were\$14,310,284.46.
 2. Sites, buildings and equipment cost.... 4,192,556.51
 3. Spent to retire bonds and to pay interest on bonds 2,169,222.05
 4. The total expenditures for all purposes for the session amounted to.....\$20,672,063.02
- The expenditures for the session, 1925-1926, were approximately \$3,000,000 in excess of those of the previous session.

Current Payments	Amount	Per Cent
Instruction - - - - -	\$10,539,311	73.7
Auxiliary Agencies - -	1,475,552	10.3
Maintenance of Plant -	878,640	6.1
Operation of Plant - -	745,990	5.2
General Control - - - -	670,791	4.7
Total - - - - -	\$14,310,284	100.0

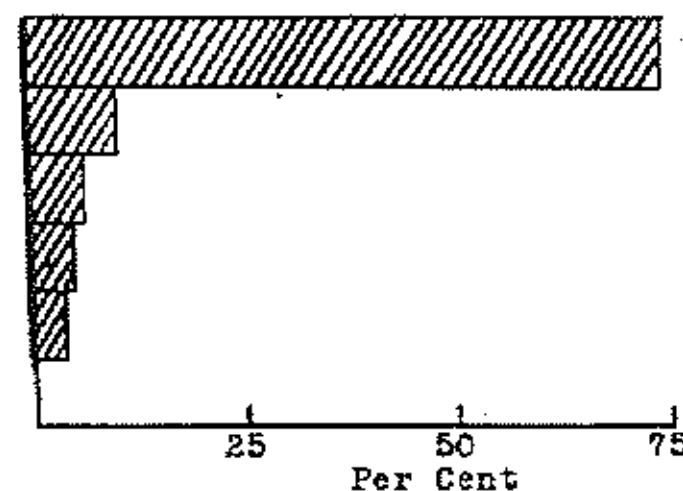

DIAGRAM 2. THE AMOUNT AND PER CENT OF CURRENT PAYMENTS--ALL SCHOOLS

Other Payments	Amount	Per Cent
Debt Service - - -	\$12,271,903	74.5
Capital Outlay - -	4,192,556	25.5
Total - - - - -	\$16,464,459	100.0

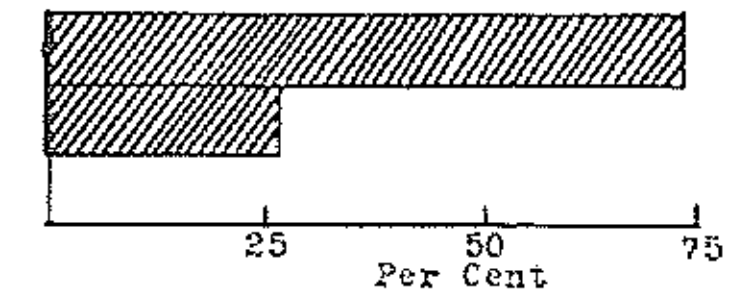

DIAGRAM 3. THE AMOUNT AND PER CENT OF CAPITAL OUTLAY, AND DEBT SERVICE--ALL SCHOOLS

Special Taxes	Amount	Per Cent
Current Payments - - -	\$3,916,937	66.1
Bonds and Interest - -	1,677,953	28.3
Capital Outlay - - - -	329,256	5.6
Total - - - - -	\$5,924,146	100.0

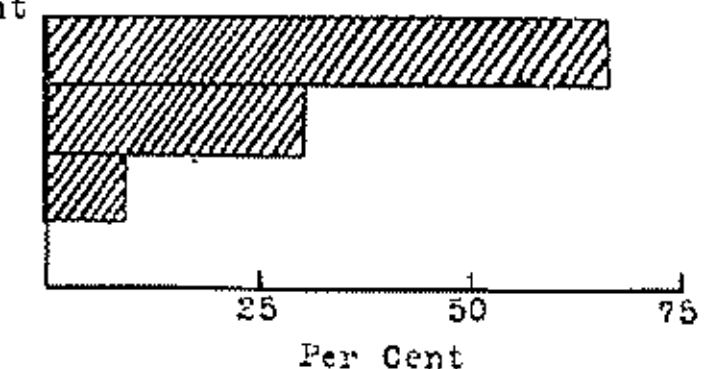

DIAGRAM 4. THE AMOUNT AND PER CENT OF ALL SPECIAL TAXES FOR CURRENT PAYMENTS, BONDS AND INTEREST AND CAPITAL OUTLAY--ALL SCHOOLS

	Amount	Per Cent

WHITE SCHOOLS

OUT-OF-STATE-FUNDS:

We receive every year certain funds from out-of-State sources. The sources and the amount contributed by each last session follow:

1. The Federal Government:

- (a) Smith-Hughes\$67,942.18
- (b) Rehabilitation 12,691.26

The Smith-Hughes funds were used to pay a part of the expense of instruction offered throughout the State in agriculture, home economics and trades and industries.

The rehabilitation funds were used to help unfortunate civilians to buy artificial limbs who had lost their natural limbs in accidents or otherwise, and in a number of cases, to assist such unfortunates in fitting themselves to make a living.

2. The General Education Board of New York..\$36,263.89

Funds contributed by the General Education Board were used in the main to pay salaries of certain employees in the State Department of Education, to finance in part the negro summer schools, to pay a part of the salaries of certain teachers in negro parish training schools and to apply on equipment of certain negro training schools.

3. Julius Rosenwald\$25,980.00

The Rosenwald funds were used to aid in building 30 negro schoolhouses throughout the State.

4. Jeanes Fund\$ 8,800.00

The money from this source was used to employ negro agents in 19 parishes who employ their time in supervising instruction in negro schools, and in organizing and directing agricultural club work among negro children.

5. Slater Fund\$ 6,100.00

The money from this source was expended for equipment in a few of the negro parish training schools.

The total of the out-of-State funds was..\$130,155.35
All of it was used to stimulate effort in certain fields of education, generally negro education.

TRANSPORTATION:

The school boards used last session 1,589 transfers, most of which were motor trucks, and these transfers accommodated 51,653 children, at a per capita cost of \$24.96.

There were only 536 one-teacher schools operated dur-

ing the session of 1925-1926, and these one-room schools enrolled probably fewer than 10,000 children. The figures mean that practically all of the white children of the State are being given their elementary and high-school instruction in schools employing two or more teachers.

The number of two, three and four-teacher schools was 1,033, and the number of schools employing five or more teachers was 604. The figures indicate that a very large proportion of our school population is being accommodated in large, well organized schools which, as a rule, employ thoroughly competent teachers.

TEACHERS:

The public schools employed last session 8,576 white teachers, 2,379 negro teachers. Their scholarship was:

	White	Negro
Number of college graduates	1,877	181
Number with two years or more of college training, but less than college graduation	4,294	426
Per cent with two years or more of college training	72	23.4
Number of male teachers employed	1,182	424
Number of female teachers employed	7,394	1,955
The average salaries paid were:		
Superintendents	\$3,298.17	
Male teachers	1,434.68	\$537.00
Female teachers	1,004.08	444.49

Seventy-two percent of the white teachers were credited with two years or more of college training. This is a splendid record. We are probably safe in claiming that no rural state maintains higher scholarship standards in its teaching staff. The record is especially creditable in view of the low salaries paid—\$1,400.00 for men, and \$1,000.00 for women. It is difficult to understand how teachers meeting such high standards of scholarship and training could be secured on the salary schedules mentioned.

Eighty-six per cent of the public school teachers is women and only fourteen percent men. These figures portray, I think, an unfortunate condition, but one that can not be obviated. The question is economic and will not be settled on the basis of our belief as to the proportion of

men and women that should be employed in the teaching staff.

I am strongly of the opinion that there should be as many men as women in the upper elementary and high-school grades, but there never will be until such time as the public shall decide to pay teachers materially higher salaries than it now pays them. Men do not enter the teaching profession because with the same education and effort their earnings are much larger in other classes of work.

*Information not available.

The above figures represent unfavorable conditions, showing, as they do, that our teachers do not remain in the same positions. With the exception of New Orleans, not as many as 50% of the teachers in a single parish have been employed in the same schools for a period as long as five years, and only 23% of the teaching staff last session have been in the same position for five years or more. In parish after parish as many as 50% of the teaching staff are new, and the average for the State was 37% new teachers. A few of the new teachers represent additions to the teaching corps. Most of them, however, did not represent additions, but their employment was necessary on account of the migratory habits of teachers, their practice of changing from school to school and from parish to parish.

It may be that the children benefit by the wider experience and contacts of teachers, due to living in different communities and meeting different people, but I think it is generally agreed that a teacher's value to a community increases with the length of time that he serves in it, provided he is the right teacher in the right place, and it seems to me, therefore, that there should be a determined effort on the part of school officials to minimize the practice of teachers' annually changing positions. Teachers should be selected with great care, and if they fill acceptably the places for which they are chosen, they should be retained in them indefinitely.

TEACHERS' CERTIFICATES:

Since the inauguration, March 11th, 1924, of the present plan of basing teachers' certificates upon scholarship and experience and eliminating all examinations, the following certificates have been issued:

	White	Negro
Professional Life	2,360	160
High-School	684	19
Professional Elementary Life	6,568	413
First-Grade	1,030	157
Second-Grade	1,128	282
Third-Grade	1,486	194
Commercial	57	
Service	2,408	417
Total	15,721	1,582
Grand Total	17,303	

Number of certificates of the different classes issued, March 11th, 1924—July 1st, 1925:

	White	Negro
Professional Life	1,612	61
High-School	410	5
Professional Elementary Life	4,876	247
First-Grade	573	47
Second-Grade	634	161
Third-Grade	889	59
Commercial	43	
Service	1,923	264
Total	10,960	844
Grand Total	11,804	

Number of certificates of the different classes issued July 1st, 1925—June 30th, 1926:

	White	Negro
Professional Life	748	39
High-School	274	14
Professional Elementary Life	1,692	166
First-Grade	457	110
Second-Grade	494	121
Third-Grade	597	135
Commercial	14	
Service	485	153
Total	4,761	738
Grand Total	5,499	

Total of all certificates issued from March 11th, 1924, to July 1st, 1926..... 17,303

An examination of the above figures discloses the following interesting and highly satisfactory facts:

1. We have issued during the period, March 11th, 1924-June 30th, 1926, approximately 2,400 professional life certificates. This is the highest class of certificate issued, and it is based upon college graduation with a reasonable amount of professional studies and practice-teaching as a part of the college course.

During the same period, only 684 high-school certificates have been issued. The basis of this class of certificate is college graduation without any professional requirements. We seem to be approaching the period when the holders of college degrees will not be employed for high-school service, unless they include in their college courses, a reasonable amount of professional studies and practice-teaching.

2. We have issued during the same period more than 6,500 life elementary certificates (to white teachers). These certificates are based upon two years of college work, issued for the benefit of persons desiring to equip themselves for teaching in the elementary field. The figures indicate that the public is demanding that children in the elementary grades shall be taught by teachers who have studied the materials used in the elementary course and who are armed with sane methods of procedure. In other words, there is a State-wide demand for trained teachers in the elementary field as well as in the high-school field.

SCHOOL ATTENDANCE:

We now use the term "registration" instead of "enrollment." Enrollment includes hundreds of duplications—that is, children moving during the session from school to school and from parish to parish and who are counted every time they enroll, while registration gives the actual number of children receiving instruction. Necessarily, the number of registered students is several hundred or thousands smaller than the number of enrolled students.

There were registered last session 263,359 white children, and 130,878 negro children. In addition, the white

private schools registered approximately 38,000 children. The 332 State-approved four-year high schools, white, registered approximately 40,000 high-school students, and graduated 6,379.

Eighty-nine of the 332 high schools are on the approved list of the Southern Association of Colleges and Secondary Schools.

Eighteen hundred sixty high-school teachers were employed last session, and the salaries paid them were—men—\$1,416.00, women—\$1,091.00.

There were 53 State-approved private high schools, registering 3,020 pupils and graduating 524.

SESSION:

The white schools were maintained for a session of 172.4 days

The negro schools were maintained for a session of 107.5 days

These figures represent a gain of 2.4 days for the white schools, and a loss of 3.5 for the negro schools. It should be stated however, that the system of accounting which was inaugurated last session is very much superior to any heretofore used, and it is probably true, therefore, that the session was longer for both white and negro schools than that of the previous year.

STATE INSTITUTIONS—WHITE:

1. Number of pupils registered.....	8,306
2. Number of graduates:	
(a) Two-year education courses.....	758
(b) Four-year education courses.....	239
(c) Post-graduate education courses.....	9
(d) Graduates other than education courses.....	493
Total.....	1,499

PRIVATE INSTITUTIONS—WHITE:

1. Number of pupils registered.....	1,831
2. Number of graduates:	
(a) Two-year education courses.....	165
(b) Four-year education courses.....	30
(c) Post-graduate education courses.....	14
(d) Graduates other than education courses.....	163
Total.....	372

We have reason to be highly gratified over the number of students in the elementary, the high-school and the college fields that are being reached with instruction.

SPECIAL SCHOOLS:

1. State School for the Deaf	
Registration.....	181
2. State School for the Blind	
Registration.....	72
3. State School for the Feeble-Minded	
Registration.....	235
4. State School for the Negro Blind	
Registration.....	25

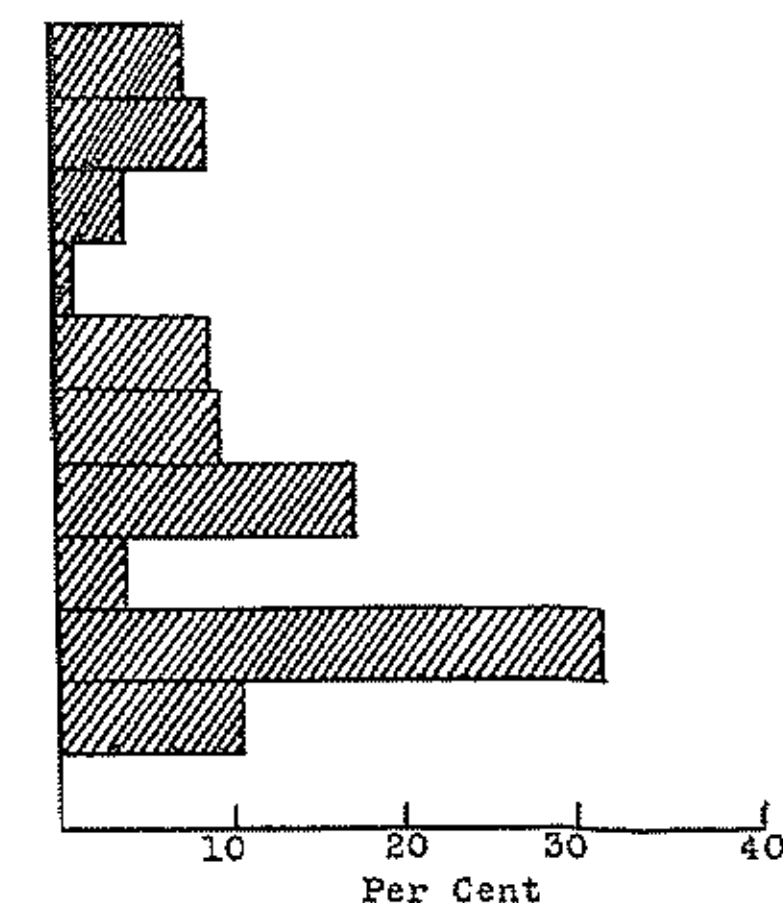

DIAGRAM 19. THE NUMBER AND PER CENT OF GRADUATES OF PRIVATE HIGH SCHOOLS ENTERING HIGHER INSTITUTIONS OF LEARNING--WHITE SCHOOLS

HOME ECONOMICS:

Two hundred thirty-three high schools organized with home economics departments. These departments enrolled approximately 10,000 girls who pursued courses in sewing, cooking and household management. In addition, 67 grammar schools in New Orleans and in Lake Charles offered home economics instruction to approximately 7,000 girls. There were, therefore, something like 17,000 girls in the public schools who received systematic instruction in the subject of home-making.

Ten departments of home economics in these schools were organized on the Smith-Hughes basis and received Federal aid; that is, a part of the salaries of the teachers was paid out of Federal funds.

The school boards spent approximately \$300,000 for salaries of home economics teachers and supplies used in home economics departments. Since however, practically all home economics teachers give instruction in other high-school subjects, the sum mentioned does not represent the cost of maintaining the home economics departments.

The girls pursuing home economics courses are required to carry projects in home-making in order that the instruction may be given as much practical application as possible.

Eight evening classes were maintained, which enrolled 416 adult women. These ladies studied such subjects as clothing, meal preparation, canning, etc.

At the beginning of the session group meetings, enrolling practically all of the teachers in home economics, were held in various parts of the State in order that the essentials in home-economics instruction might be stressed and agreed upon.

Forty-nine negro schools were organized with home economics departments, which enrolled approximately 2,500 girls.

The work in home economics is popular throughout the State, both school officials and laymen believing that it is organized on a scientific and a practical basis and that it is resulting in equipping thousands of our girls with the training necessary to enable them to direct and to do successfully the work required in good homes.

AGRICULTURE:

Forty high schools were organized with agricultural departments, aided with Federal funds, to the extent that a part of the salaries of the teachers in agriculture were paid out of such funds. These departments reached approximately 1,200 boys.

A number of the agricultural schools operated evening classes for the benefit of adults, and a few of them, part-time classes for the benefit of older boys who were unable to attend the regular day classes.

All of the boys enrolled in agricultural departments were required to carry home projects. The gross income from such projects was \$172,000, or \$2.01 for every dollar spent on salaries of agricultural teachers.

The teachers of agriculture and the boys enrolled in their classes are always on the alert to give such practical assistance as they can to the farmers of their community

by such work as spraying fruit trees, vaccinating hogs and cattle, etc.

Nineteen of the negro schools had agricultural departments which reached approximately 400 students.

The salaries paid the negro agricultural teachers amounted to \$19,223, while the returns from the agricultural projects of the negro boys amounted to \$58,709.

The agricultural work is thoroughly practical, and its purpose is to impress the youth of the State not only with the importance of agriculture, but to stress a few of the essentials that underlie successful farming operation.

SCHOOL BUILDINGS:

During the session, the State Department of Education inspected and approved 49 sets of plans and specifications submitted by architects. The average cost of the buildings for which the 49 plans provided was \$57,806.12, and the total cost of the 49 buildings was approximately \$3,000,000.

In addition to the plans and specifications prepared by licensed architects, this office supplied superintendents throughout the State with plans and specifications for 30 Rosenwald buildings, the average cost of which was \$4,266.66. The total cost of the 30 buildings was approximately \$128,000.00.

The building supervisor prepared, upon the request of parish superintendents, plans and specifications for 6 buildings, costing on the average of \$7,000.00, or a total of \$42,000.00. He also prepared plans and specifications for 1 auditorium, costing \$7,500.00, and for 2 repair jobs, costing \$14,000.00. He inspected from time to time, 98 public school buildings while under construction, and he examined 42 old buildings and made suggestions as to necessary repairs.

I am convinced that our Division of Schoolhouse Inspection is a very important one. The supervisor in charge renders highly valuable services in passing upon the plans and specifications of architects, and even more valuable services in inspecting materials and workmanship while schoolhouses are under construction.

It is probably safe to say that we are now building the best schoolhouses that have ever been erected in the State, and these superior buildings are due, to some extent at least, to the services of the building supervisor.

The school building division costs the State nothing, as the salary and expenses are financed by the General Education Board.

NEGRO SCHOOLS:

The following tables give the essential facts concerning certain phases of negro school work:

Parish Training Schools

Number doing two years' high-school work	3
Number doing three years' high-school work	13
Number doing four years' high-school work	5
Value of school plants	\$363,868.00

1. Teachers' salaries	1,290.00	1,290.00
2. Traveling expenses	53.00	53.00
Totals	\$17,533.99	\$20,080.99

(E) Julius Rosenwald		Contribu-
	Rosenwald Fund	tions Within State
1. Thirty-three building projects	\$26,100.00	\$102,218.00
2. Salary of State Building Agent	1,080.00	440.00
Totals	\$27,180.00	\$102,658.00
Recapitulation		1925-1926
	Amount Contributed by Agencies	
	Without State	*Within State
A. General Education Board	\$ 6,945.00	\$ 37,457.00
B. Jeanes Board	8,800.00	9,173.00
C. Slater Fund	6,100.00	66,111.00
D. Federal Board—Smith-Hughes	17,533.99	20,080.99
E. Rosenwald Fund	27,180.00	102,658.00
Totals	\$66,558.99	\$255,479.99

*This table shows only the amount contributed within the State to assist projects aided by outside agencies and does not represent the total amount expended.

There are 21 parish training schools, which represent the best type of negro schools in the State and which are rendering valuable assistance in training teachers for negro school work.

The 18 Jeanes agents employed in as many parishes are proving constructive forces in supervising instruction in negro schools and in stimulating interest in industrial work and in raising money among the negroes for worthy school purposes.

The Rosenwald appropriations have proven a highly important stimulus in providing suitable negro school-houses and in lengthening the term of negro schools.

The Slater Board aids constructively in equipping a number of negro schoolhouses and in paying a part of the salary of a number of negro teachers.

The General Education Board has, for many years, demonstrated a deep interest in negro education and has contributed in numerous ways to the progress of the negro schools.

Such funds as we receive from out-of-State sources are turned over to the State officials to be expended under the direction of State and parish school officials. None of these agencies exhibits any officiousness in the handling of these funds.

ANNUAL REPORT

PART II

STATISTICAL STATEMENT

OF THE

OPERATIONS OF THE SCHOOLS OF THE STATE

1925-26

SUMMARY OF STATISTICAL TABLES 1925-26

PUBLIC ELEMENTARY AND HIGH SCHOOLS FINANCIAL STATEMENT

Receipts—

A. State

2. Federal (Vocational Board)	67,942.18
3. Special (out of State funds)	40,721.91

B. Parish

1. Parish Constitutional tax	6,614,771.79
2. Parish-wide special taxes	3,214,824.43
3. Proceeds from bond sales	4,185,482.00
4. Other parish sources	1,545,847.44

C. District and ward (special taxes)

3,057,395.37

Total \$ 22,673,290.41

Temporary loans from banks

8,309,477.51

\$ 30,982,767.92

Payments—

A. General control	\$ 670,791.40
B. Instruction	10,539,311.10
C. Operation	745,990.39
D. Maintenance	878,639.75
E. Auxiliary Agencies	1,475,551.82

Total current payments

\$ 14,310,284.46 \$ 14,310,284.46

F. Capital outlays

4,192,556.51

G. Debt service

2,989,185.45

Total \$ 7,181,741.96 7,181,741.96

Total of all payments

\$ 21,492,026.42

Return of temporary loans from banks

9,282,717.37

Total payments for elementary schools	White	Negro
.....	\$ 10,754,226.67	\$ 1,550,630.89

Total payments for high schools	White	Negro
.....	5,762,002.41	230,353.00

SPECIAL TAXES

Parish-wide—

1. Current payments	\$ 2,864,921.81
2. Capital outlays	52,892.84
3. Redemption bonds	297,009.78

4. Total \$ 3,214,824.43

District and Ward—

5. Current payments	1,052,015.41
6. Capital outlays	276,362.84
7. Redemption bonds	1,380,943.11

8. Total \$ 2,709,321.36

9. Total all special taxes

\$ 5,924,145.79

DEBTS

1. Amount bonded debt	\$ 18,984,990.00
2. Amount short term loans	2,746,422.01
3. Total	\$ 21,731,412.01

ATTENDANCE

Registration of Pupils—

	White	Negro
Elementary grades	221,725	126,993
High-school grades	41,634	3,835
Total	263,359	130,828
Special schools	12,035	2,126

Grand total

275,394 133,004

Average Daily Attendance—

Elementary grades	166,728.65	93,524.54
High-school grades	34,635.35	3,035.81

Total 201,364.00 96,560.35

Average Daily Absence—

Elementary grades	26,100.56	18,030.01
High-school grades	3,261.81	486.00

Total 29,362.37 18,516.01

Per Cent of Attendance—

Elementary grades	86.5	83.8
High-school grades	91.4	86.1
Both elementary and high school	87.3	83.9

Per Cent of Absence—

Elementary grades	13.5	16.2
High-school grades	8.6	13.8
Both elementary and high school	12.7	16.1

Length of Session—

Elementary grades	170.1	100.5
High-school grades	173.5	140.0
Both elementary and high school	172.4	100.8

PROMOTION OF PUPILS

Per Cent of Membership Promoted—

	White
Elementary grades	76.5
High-school grades	74.3
Both elementary and high school	76.1

STATE-APPROVED FOUR-YEAR HIGH SCHOOLS

	White
Number approved	332
Number teachers employed	1,860
Average salary of teachers	\$1,229.00
Number pupils registered	39,656
Number of graduates	6,335
Number of graduates of year 1924-25 entering higher institutions..	2,590

TRANSPORTATION OF PUPILS

	White
Number transfers operated	1,567
Number pupils registered in transfers	50,550

THE TEACHING STAFF

	White	Negro
Number teachers employed	8,538	2,362
Number having five or more years of experience	4,640	1,184
Number serving in present positions five or more years..	2,001	574
Number in present position the first year	2,795	751

NUMBER AND SIZE OF SCHOOLS

	White	Negro
Number having:		
One teacher	536	977
Two teachers	404	252
Three teachers	175	70
Four teachers	96	36
Five teachers	45	19
Six or more teachers	485	55

THE PHYSICAL PLANT

New Construction, Equipment and Sites

	White	Negro
Number brick buildings	60	6
Number frame buildings	225	78
Number of additions constructed	23	10
Number of sites added	68	26
Value of new equipment	\$ 692,628.42	\$ 26,746.77
Total value of new buildings, sites and equipment..	\$5,121,469.36	\$525,293.89
Number elementary classrooms added	143	73
Number high-school classrooms added	83	17

PRIVATE ELEMENTARY AND HIGH SCHOOLS

Teachers—	White	Negro
Kindergarten	30	14
Elementary grades	883	227
High-school grades	332	53
Total	1,245	294
Session—		
Average number months	9.1	8.7
Average number days taught	180	174
Pupils registered—		
Kindergarten	1,281	584
Elementary grades	31,753	9,852
High-school grades	4,481	1,158
Total	37,515	11,594
High-school graduates	719	102
Schools—		
Number reporting	143	47
Number not reporting	60	28
Total	203	75
Number of State-approved high schools	53	1
High-school graduates of 1924-25 entering higher institutions—		White
In Louisiana		341
In other states		39
Total		380

THE COST OF ELEMENTARY AND HIGH-SCHOOL EDUCATION

	White	Negro
Cost per pupil registered—		
Elementary grades	\$ 39.98	\$10.67
High-school grades	93.85	35.14
Both elementary and high school	48.50	11.40
Cost of pupil of average membership—		
Elementary grades	45.98	12.15
High-school grades	103.11	38.73
Both elementary and high school	55.36	12.97
Cost per pupil of average attendance—		
Elementary grades	53.17	14.50
High-school grades	112.82	41.98
Both elementary and high schools	63.43	15.45

HIGHER INSTITUTIONS, PUBLIC AND PRIVATE

Number of institutions	8	14
Expenditures—		
Current payments	\$2,797,696.65	
Capital outlay	1,304,993.00	
Total	\$4,102,689.65	
Number instructors employed	851	353
Number students registered	8,306	1,831
Number of students per instructor	9.76	5.18
Average cost per student per session (based on current payments)	\$ 270.76	
Number graduates—all courses	1,499	372
Number graduates teacher-training courses		
(a) Two-year courses	758	165
(b) Four-year courses	239	30
(c) Graduate courses	9	14
(d) Total teacher-training	1,006	209
Number students registered for correspondence study	1,292	
Number students registered in extension classes ..	1,442	
Estimated value of physical plants	\$8,776,206.82	

SPECIAL SCHOOLS

Blind, Deaf, Feeble-minded and Delinquent

Number of schools	5
Number of instructors	70
Number pupils registered	513
Number of pupils per instructor	7.32

TABLE I.

RECEIPTS FROM ALL SOURCES—1925-26.

*Plaquemine and St. Bernard Parishes did not operate high schools at this time.

†Data for St. Helena Parish was taken from the report for 1924-25 session. The schools in this Parish operated only a part of the session of 1925-26.

‡In several reports, slight errors in the placement of certain items were found. Some superintendents in reporting the faculty in state-approved high schools included teachers in the elementary grades of such schools. In cases of this kind, the reports of high-school principals to the state supervisor of high schools were referred to and the number of teachers and the salaries of same in high-school departments were taken from these reports. A corrected figure for the expenditure for salaries of elementary teachers was found by subtracting the salaries of high-school teachers from the total salaries of all teachers.

The salaries of high-school principals are included in the averages for high-school teachers. The average salary would have been much lower if salaries of principals had been omitted.

Note: Explanation of terms used:

- (a) Administration,—salaries of officers and clerks, office expenses, supplies, travel, printing, etc.
 (b) Library,—salaries, books, magazines, supplies, etc.
 (c) Student welfare,—dean of women, medical and hospital service paid by the institution, etc.
 (d) Operation of plant,—labor, supplies, fuel, light, water, power, etc.
 (e) Maintenance of plant,—repairs, labor, replacement, insurance, etc.
 (f) Salaries for instruction,—payments for teaching service.
 (g) Supplies for instruction,—laboratories, materials, etc.
 (h) Extension division,—salaries, supplies, travel, printing, office, etc.
 (i) Agricultural extension,—same as h above.
 (j) Experiment stations,—same as h above.
 (k) Lands,—land and improvements thereto as roads, pavement, fences, drainage, landscape work, etc.
 (l) Buildings,—new buildings, additions and services incident to their use as light, heat, water, power, sewerage, etc.
 (m) Equipment,—all equipment as laboratories, furniture, etc.

†8 Hammond Junior College	1								4	
Totals	27	70	165	62	138	277	15	125	829	

167

Note: Institutions operating summer sessions of 12 weeks have divided by 3, those operating 9 weeks by 4, thus reducing the numbers to the basis of the regular session of 36 weeks and adding them to it. The result is a single measure for the year in terms of an accepted standard,—the academic session of 36 weeks.

*Of the 37 instructors reported by Southern University, 29 are teaching high-school subjects.

†No summer school operated.

169

Note: 1. Institutions were requested to deduct withdrawals and to report net registration by quarters.

2. Registration for the year of four quarters is reported in terms of the regular academic year of 36 weeks,—an accepted standard. The average registration of the summer session of 12 weeks was reduced to the basis of the regular session by dividing by 3 and then added to the average registration during the three quarters of the regular session.

*Southern University registers 834 high-school students in addition to the college registration
